Professional Summary

Product Manager at Curatal with 7+ years of combined experience in audit, sales analytics, development and product management. Defines product requirements and builds internal tools and AI systems using Python, SQL, Node.js and React. Also serves as CISO. Pursuing an M.Tech in Data Science and AI at PES University. SAS Base Programming certified.

Technical Skills

Product: PRDs, BRDs, user stories (INVEST), process flows, test cases, roadmaps, stakeholder management, Figma and UI/UX design systems.

Programming and Databases: Python (Pandas, NumPy, scikit-learn, Matplotlib, Seaborn), SQL (joins, CTEs, window functions, subqueries), PostgreSQL, JavaScript, Node.js and SAS.

BI and Reporting: Tableau, Power BI (DAX, data modeling), Excel (Pivot Tables, Power Query, VBA and macros).

AI and ML: Machine learning, deep learning, NLP, regression, tree models, XGBoost, LightGBM, clustering, PCA, time series, feature engineering, SHAP and model evaluation (AUC, KS, PSI, Gini). Ollama, OpenAI Realtime API, Google Speech-to-Text and AWS Polly.

Web and Integrations: React, Express, Tailwind CSS, REST APIs, WebSockets, Microsoft Graph API, Kafka, Docker, Exotel and Twilio.

Security: Information security, ISO 27001:2022, DPAs, DPIAs and vendor risk management.

Professional Experience

Product Manager

Curatal (Progressive Video Pvt. Ltd.)

May 2025 – Present

Bengaluru

Previous roles: Senior Sales Operations Analyst; Sales Operations & Analytics Analyst.

- Own PRDs and flows for the candidate portal, portfolio, Assured Interviews wallet, Club Curatal and Vetted vs Pre-Interviewed recruiter features.
- Defined panel resume PII redaction, skill taxonomy and candidate search rules; created user stories and the candidate portal design system.
- Build internal tools and AI systems, including Commercial Approvals, an AI Recruiting Voice Agent and an AI Assessment System.
- Serve as CISO, preparing data protection documents, vendor risk responses and SLA documentation for enterprise clients.
- Build Tableau and Power BI dashboards for pipeline, revenue and conversions; automate reporting with Python and Excel.
- Use SQL for data extraction, reconciliation and validation. Work with Data Science and Data Engineering on model QA, data models and backend microservices.
- Coordinate with Sales, Product, Marketing and Client Success on segmentation, business rules, KPIs and SLA monitoring.

Professional Experience Continued

Senior Audit Assistant

RSS & Co.

Bengaluru

Apr 2017 – Mar 2023

- Conducted statutory audits, reconciled large datasets and identified exceptions across client portfolios.
- Built SQL and Excel reconciliation routines and prepared reports on financial anomalies, cost trends and risks for client stakeholders.

Key Projects

- **Curatal Commercial Approvals**

React, Node.js, PostgreSQL

Built a proposal and approvals platform with CEO and Director approval flows, versioning and role-based dashboards. Automated PDF proposals, Outlook integration and Excel exports; wrote the PRD and 85 test cases.

- **AI Recruiting Voice Agent and Speech Pipeline**

Node.js, OpenAI, Google STT, AWS Polly

Built AI calls for candidate screening with Exotel and Twilio, scheduling and job criteria extraction. Added speech recognition, Indian-English voice synthesis and audio processing for real-time conversations.

- **AI Assessment System**

Python, Ollama

Built a modular technical assessment system using lightweight local models for low-RAM environments. Created 14 structured Q&A files across software engineering topics.

- **AI Resume Classifier**

Python, scikit-learn, Streamlit

Built an NLP classifier using TF-IDF and Logistic Regression. Evaluated it with precision, recall and F1, and deployed it with Streamlit.

- **Data Analytics Projects**

Tableau, Python

Created UK Crime dashboards and story views in Tableau. Analyzed 8,000+ Netflix titles with Pandas and Seaborn to identify trends by year, country, genre and rating.

- **ML Hackathons**

Python, XGBoost, LightGBM

Ranked 5th in House Price Prediction (RMSE $\approx$ 98.15) and achieved AUC $\approx$ 0.9928 in Employee Attrition Prediction, using ensembles and SHAP for interpretation.

Education

M.Tech in Data Science and Artificial Intelligence

Pursuing

PES University, Bengaluru

Coursework: Machine Learning, Deep Learning, Statistical Methods, Databases and SQL, Mathematical Foundations.

Focus: Machine Learning and NLP.

B.E. in Electronics and Communication Engineering

CGPA: 9.1

R.V. College of Engineering, Bengaluru

Certifications

- SAS Base Programming Certification, SAS 9.4 (Performance-Based Exam)
- SQL Fundamentals
- Python for Data Analysis
- Power BI for Beginners
